## SUMMARY

---

Recent Computer Information Systems graduate specializing in Software Design and Development. Experienced in frontend and backend development, with a focus on user-friendly web applications through academic projects and summer tech role. Eager to apply technical skills and creative problem-solving to a dynamic team in web development, web design, or software development.

## EDUCATION

---

### Okanagan College

*Bachelor of Computer Information Systems*

Major in Software Design and Development

*April 2024*

## WORK EXPERIENCE

---

### Business Tech Ninjas

*Jr. Technician, Web Designer*

*May 2022 – August 2022*

- Developed WordPress membership websites, wireframes, and prototypes to enhance user experience and functionality.
- Implemented targeted marketing automation solutions for enhanced user engagement, resulting in increased conversions and customer satisfaction.
- Demonstrated expertise in WordPress website management, marketing automation, email writing, content creation, and troubleshooting technical issues.

## CAPSTONE PROJECTS

---

### Algorithmic Trading Software

*Full stack Developer, UI/UX Designer*

*September 2023 – April 2024*

- Developed a user-friendly web application with Bootstrap and JavaScript for configuring the trading system and securely exporting financial data.
- Secured sensitive financial data to comply with industry regulations.
- Created efficient data acquisition, processing, and staging routines using Python and SQL to enhance data flow and integrity.

### Flock Audio Web Application

*Frontend Developer, UI/UX Designer*

*September 2021 – April 2022*

- Developed a web application tailored for analog routing technology solutions within the professional audio applications domain.
- Constructed custom schematics and audio setups, integrating innovative solutions with Bootstrap-React.
- Contributed to enhancing the user experience and interface design of the application.
